Sixth Annual

Current Issues in Anatomic Pathology: 1990

May 24–25, 1990  San Francisco, California

Presented by The Department of Pathology, University of California School of Medicine at San Francisco

This annual course addresses a wide range of topics in anatomic pathology and explores new and evolving areas in the analysis of disease. Its aims are to provide practical information that will aid the pathologist in solving problems often encountered in the laboratory, and to give an update on several new approaches that may soon be applicable to anatomic pathology.

The conference will be held at the Union Square Holiday Inn. As part of the program, lunch will be provided each day in a private dining room on the top floor of the hotel, which offers a spectacular view of the Bay Area. There will be ample opportunity for informal discussions with the faculty at these lunches, during the morning and afternoon coffee breaks, and at the reception which will follow the lectures on the first day of the course. Evenings are free for participants to explore the city.

The Union Square Holiday Inn is located on Sutter Street at Powell just one block from Union Square, the hub of downtown San Francisco. The area is renowned for its shops and restaurants, all within easy walking distance of the hotel. Museums, theaters, and concert halls are also readily accessible. You will be pleased to find the Union Square area shows no ill effects from the quake. There will be a hospitality desk at the program to provide information on shopping, restaurants, and cultural events. Rooms at the Union Square Holiday Inn will be available to course participants at a special rate. Alternative lodging can be found in the Union Square area offering more modest or more luxurious accommodations.
