Although clearly focusing on diagnostic surgical pathology, this annual course also addresses a wide range of topics in anatomic pathology and explores new and evolving areas in the diagnosis and analysis of disease. It aims to provide the latest practical and theoretical information that will aid the practicing pathologist in solving those problems most often encountered in the anatomic pathology laboratory.

The twelfth annual conference will span three days and overlap with one day of the Memorial Day weekend (Thursday, May 23 through Saturday, May 25, 1996). This will allow participants to combine a professional education experience with a holiday in San Francisco. Also participants will be able to register either for the entire three day meeting or for any combination of individual one day blocks. The first day, Thursday, will be devoted to lymphoma pathology; the second will be devoted to lung cancer and individual case presentations; and the final day, Saturday, will be devoted to prostate, bladder, and kidney pathology. This modular design will allow each registrant to individually tailor this educational experience to match personal educational needs and planned activities in San Francisco.

The conference will be held at the Mark Hopkins Intercontinental Hotel, located on Nob Hill in San Francisco. As part of the program, lunch will be provided each day at the Top of the Mark restaurant on the top floor of the hotel. The Top of the Mark provides one of the most spectacular panoramic views of San Francisco and of the Bay in the entire region. There will be ample opportunity for informal discussions with the guest and UCSF faculty at these lunches, during morning and afternoon coffee breaks, and at the reception, which follows the lectures on the first day of the course. Evenings are free for participants to enjoy the city and bay area. The hotel is ideally situated for viewing and exploring San Francisco. The California Street Cable Car provides unique transportation to Chinatown and the Financial District, while the Powell Street Cable Car (one block from the hotel) travels to Union Square and Fisherman’s Wharf. Opportunities for shopping, dining, and entertainment abound. There will be a hospitality desk at the program to provide information and assistance.
