Thursday - Saturday
May 23-25, 2013

Daily Self-Assessment Modules (SAM) will be offered for special SAM CME credit hours

Cytology Seminar
Wednesday, May 22, 2013
(separate fee, limited enrollment)
This annual course addresses a wide range of topics in anatomic pathology and explores new and evolving areas in the diagnosis and analysis of disease. It aims to provide the latest practical and theoretical information that will aid the practicing pathologist in solving those problems most often encountered in the anatomic pathology laboratory.

An audience response system will facilitate questions and discussion. A complete course syllabus will be provided for all participants. Participants will be able to register for either the entire three day meeting or for any combination of individual one day blocks.

EDUCATIONAL OBJECTIVES

The principal objective of this activity is to identify areas of diagnostic difficulties and challenges in everyday surgical pathology and cytopathology practice, and to provide expert insight on selected topics through different educational formats. Educational experience is further enhanced through collegial contact and one-on-one interaction throughout the course. The topics selected each year reflect areas in which substantial information and progress has been made as exemplified by recent publications in various reports or journals. The topics of discussions also focus on areas in which there is significant difficulty in interpretation of pathological features. In general terms, we expect that at the end of this course, the participants will be able to:

1. Evaluate common mistakes and pitfalls in the diagnosis of specific diseases (see above for specific diseases in the current course) in everyday surgical pathology.
2. Employee knowledge of mimickers of specific diseases in each specialty and learn to interpret special studies that will allow easier differential diagnosis.
3. Apply pertinent histopathological characteristics of diseases to allow unequivocal diagnosis.
4. Use new and additional components of the pathology report that will improve its clinical value.
5. Integrate about the recent changes/modifications in the pathological classification of diseases or lesions in practice.
29TH ANNUAL UCSF
Current Issues in Anatomic Pathology  Cytology Seminar
Wednesday, May 22, 2013

CYTOLOGY SEMINAR
Enrollment in this seminar is limited to 18 persons and will be determined on a first-come, first-served basis. The seminar will be held on the UCSF San Francisco VA Medical Center Campus.

Shuttle service will be provided between the Hotel Nikko and the San Francisco VA Medical Center.

Seminar Registration Fee: $275

Please call the registration office (415-476-5808) to verify space is available before sending payment for the Cytology Seminar.

Seminar Faculty

Anna B. Berry, MD  Associate Professor of Pathology, UCSF
Kirk D. Jones, MD  Professor of Pathology, UCSF
Britt-Marie Ljung, MD  Professor of Pathology, UCSF
Poonam Vohra, MD  Assistant Professor of Pathology, UCSF

EDUCATIONAL OBJECTIVES
To present the audience a hands-on experience in diagnostic problems in everyday cytopathology practice and an update on recent developments in the use of special techniques in cytopathology. At the end of the cytopathology course, the learner will be able to identify common problem areas in cytopathology practice, recognize potential pitfalls, and develop a differential diagnosis and a management plan. The learner will be able to identify the practical benefit of special techniques.
