Clinical laboratory Scientist Training Program

Program Overview

The Clinical Laboratories at UCSF Medical Center offer paid one-year post baccalaureate Clinical Laboratory Scientist Training Program leading to obtaining California licensure as a clinical laboratory scientist. Training starts in September 2020. Please return in February 2020 when we have updated our website application information.

During the structured competency-based education program, student spend 40 hours a week, eight hours a day dividing his/her time between didactic and practical training. Students will rotate throughout the laboratory sections under supervision of licensed CLS. Trainees practice different skills and techniques specific to the section they are in. Thus provides trainees with in-depth exposure to a large variety of laboratory procedures.

Please return in February 2020 when we have updated our website application information.
