# Liver and Gastrointestinal Pathology Update

The background of the entire page is a photograph of the Golden Gate Bridge in San Francisco, California. The bridge is shown from a low angle, looking up at one of its massive towers. The bridge's structure is a mix of white and blue, and the water of the bay is visible in the lower part of the frame. The sky is a clear, pale blue. The image is slightly faded and has a blue tint, especially in the lower right section where the text is located.

# Liver and Gastrointestinal Pathology Update

This course provides general surgical pathologists with an update of practical diagnostic issues that will be useful in everyday practice.

## LIVER TOPICS:

- Steatohepatitis
- Fibrosis/Cirrhosis
- Immunohistochemistry of tumors to differentiate metastatic lesions from hepatocellular carcinoma
- Update on benign hepatocellular lesions
- Problem lesions to differentiate from acute and chronic hepatitis
- Update on iron overload
- Problem vascular flow lesions

## GASTROINTESTINAL TOPICS:

- Problematic pancreatic tumors and dysplasias
- Serrated polyps of the colon and other issues for reporting of colon cancer
- Dysplasias of GI tract
- Problem colitides
- Other problem areas of small bowel and gastric pathology, including polyps and cancers

## EDUCATIONAL OBJECTIVES

### Attendees completing this course should be able to:

- Focus on what factors help in the correct processing of the liver biopsy specimen;
- Develop competencies for the criteria that determine the new classifications of hepatic adenomas and focal nodular hyperplasia, as well as the new immunohistochemical techniques to distinguish benign and malignant tumors of the liver;
- Incorporate the criteria for management of problems encountered in the diagnosis and differentiation of various forms of hepatitis, including viral and autoimmune hepatitis; as well acute hepatitis and steatohepatitis;
- Recognize the rising public health epidemic of fatty liver disease in adults and children, to improve competency in making pathologic diagnosis;
- Improve diagnosis of fibrosis in the liver as related to etiology and patterns of disease in order to improve competency in this practice gap;
- Describe new developments in the diagnosis and pathogenesis for genetic and acquired iron overload of the liver to fill the information practice gap;
- Study the criteria for the diagnosis of vascular lesions in the liver as a rare, but major problem practice gap for general pathologists;
- Review the criteria for dysplasia of Barrett's esophagus and stomach to develop competency in this problem lesion;
- Discuss and establish a competency for the spectrum and diagnostic criteria of lesions of the small bowel and the problem areas of colitis in order to determine etiology; in order to establish competency for these lesions;
- Study the diagnostic criteria to separate both polyps of the stomach from early gastric cancer as well as distinguish hyperplastic polyp from serrated adenoma of the colon, a precursor to colon cancer, and to also develop competency in the reporting of colon cancer.

## ACCREDITATION

The University of California, San Francisco School of Medicine (UCSF) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

UCSF designates this educational activity for a maximum of **13.25 AMA PRA Category 1 Credit(s)<sup>™</sup>**. Physicians should only claim credit commensurate with the extent of their participation in the activity.

This CME activity meets the requirements under California Assembly Bill 1195, continuing education and cultural and linguistic competency.

For the purpose of recertification, the American Nurses Credentialing Center accepts *AMA PRA Category 1 Credit<sup>™</sup>* issued by organizations accredited by the ACCME.

The California Board of Pharmacy accepts as continuing professional education those courses that meet the standard of relevance to pharmacy practice and have been approved for *AMA PRA Category 1 Credit<sup>™</sup>*.

### SIR RODDY N.M. MACSWEEN, MD, FRCP Professor Emeritus

Sir Roddy MacSween graduated BSc (Hons) from the University of Glasgow in 1956 and MB.ChB in 1959. He proceeded to become a Member of the Royal College of Physicians of Edinburgh (MRCP [Edin]) with diseases

of the blood as his specialist subject in 1964 and in the same year became MRCP (Glas). He obtained an Honours MD from the University of Glasgow in 1973 for a thesis on "Clinico-Pathological and Immunological Studies in Liver Disease".

He chose pathology as his career, becoming a member of the Royal College of Pathologists in 1967; a postgraduate fellowship allowed him two years study (1968-69) at the University of Colorado Medical Center in Denver, where he developed major interests in both hepatology and gastroenterology. On his return to Glasgow in 1971 he became a Wellcome Senior Research Fellow and thereafter proceeded to become a Titular Professor of Pathology at the

University of Glasgow. In 1984 became a full Professor and Head of Department based at the Western Infirmary Glasgow, a position which he held until his retirement in 1999.

He has a long list of peer-reviewed publications, predominantly on pathological and immunological aspects of liver diseases, edited or co-edited some 15 books, notably 9 editions of Recent Advances in Histopathology, and the 14th Edition of Muir's Textbook of Pathology, a standard undergraduate text. The first edition of Pathology of the Liver was published in 1979 with Peter Anthony and Peter Scheuer as co-editors. With the publication of the fifth edition (2006), it is now known as MacSween's Pathology of the Liver.

From 1996 to 1999 he was President of the Royal College of Pathologists and from 1999-2000 served as Chairman of the Academy of Medical Royal Colleges. He became a Fellow of the Royal Society of Edinburgh in 1985; he was knighted in 2000 for services to medicine and pathology; and he was awarded an Honorary Doctorate of Science by the University of Glasgow in 2007.
