Setting up Trusted Web Sites
And
Allowing Pop-Ups

Open Internet Explorer and select Tools → Internet Options…

Select the Security Tab in the following window
Highlight the Trusted sites icon and click on Sites… as shown below.

Uncheck the “Require server verification…” box and enter as shown below and click on “Add”. The example is for yahoo.com. Substitute yahoo.com with the Domain name of the website in question.
The new entry is shown under Web sites:

Repeat the procedure entering with https://. An example is shown below for the Domain yahoo.com.
Click the “OK” buttons to close the window. Select the Privacy Tab on the Internet Options window.

Click on the “Settings…” button.
Enter as shown below and click on “Add”. The example is for yahoo.com. Substitute yahoo.com with the Domain name of the website in question.

After that, the new entry will be listed under Allowed sites:

Click “Close” and then “OK” on the next window to exit.
