Algorithm C

discordant, VWFAG >> RCOF (RCOF/VWFAG ratio <0.5-0.7):
perform VWMULT

abnormal pattern

perform RIST

von Willebrand disease, type 2M

normal pattern

enhanced

perform VWF exon 28 gene analysis

von Willebrand disease, type 2A

not enhanced

positive

von Willebrand disease, type 2B

negative

perform GP1BA gene analysis

positive

von Willebrand disease, platelet-type

negative

consider other causes of bleeding, repeat testing, and/or testing for rare variants†
