Practical Issues in Bone Specimens, Benign and Malignant

Andrew Horvai, MD, PhD
Associate Clinical Professor of Pathology

Friday, June 3, 2010
12:15 P.M. – 1:15 P.M.

TOPICS COVERED

This Tutorial will present and discuss example cases that illustrate issues related to the diagnosis of the most common bone specimens. These include:

1. Infectious, inflammatory and other reactive lesions.
2. Giant cell rich lesions.

OBJECTIVES

1. Provide an approach to small, core biopsies.
2. Provide an approach to integrating imaging of bone tumors in diagnosis.
3. Provide a diagnostic approach to most common benign and malignant bone tumors.

Participants will:

Refine their handling and recognizing of the most common benign and malignant lesions of bone.

A separate fee of $75.00 (including lunch). Limited space
