Things that go “Bump” in the Skin

Luke Perkocha, MD
Associate Clinical Professor of Pathology and Dermatology

Thursday, June 3, 2010
12:15 P.M. - 1:15 P.M.

TOPICS COVERED

This Tutorial will present and discuss lesions that present as nodules in the skin, with an emphasis on adnexal tumors and entities in their histologic differential diagnosis. We will discuss:

1. The morphologic spectrum of common adnexal tumors, including unusual variants.
2. Non-adnexal lesions that can be mistaken for adnexal tumors, and enter into the differential diagnosis.
3. Cutaneous tumors that can be a marker for syndromes or conditions involving organs outside the skin.
4. A brief update from the front lines of the “nomenclature wars!”

OBJECTIVES

Participants will:

Refine their handling and reporting of non-melanocytic lesions that present as skin nodules or masses.

A separate fee of $75.00 (including lunch). Limited space
