Potpourri of thyroid and parathyroid lesions

Elham Khanafshar, MD, MS
Associate Clinical Professor of Pathology, UCSF

Friday, May 27, 2011
12:15 P.M. - 1:15 P.M.

TOPICS COVERED
This Tutorial will present and discuss example cases that illustrate issues related to:

1. Parathyroid carcinoma, atypical parathyroid adenoma.
2. Different types of thyroid carcinomas.
3. Variants of papillary thyroid carcinoma.

OBJECTIVES
Participants will:

1. Learn about parathyroid carcinoma, atypical adenomas and application of immunohistochemical stains.
2. Learn about various types of thyroid carcinomas.
   - Compare and contrast the more challenging diagnoses.
   - Know the application of immunohistochemistry.
3. Learn about different variants of papillary thyroid and their prognostic significant.

A separate fee of $75.00 (including lunch). Limited space
