Solid Lesions of the Pancreas

Grace E. Kim, MD
Professor of Pathology, UCSF

Thursday, May 26, 2011
12:15 P.M. - 1:15 P.M.

TOPICS COVERED

Neoplastic solid lesions of the pancreas will be covered in this interactive slide seminar session with emphasis on endocrine proliferations and neoplasms and its potential mimics (including islet aggregation, endocrine microadenoma, variations in endocrine neoplasm and carcinoma, solid pseudopapillary neoplasms, acinar cell carcinoma). Appropriate use of immunohistochemistry will be incorporated to resolve differential diagnostic dilemmas and to determine prognostic features.

OBJECTIVES

Participants will:
1. Obtain a practical approach to solid pancreatic lesions and recognized differentiating characteristics
2. Have the opportunity to review the classification of endocrine proliferation and neoplasms
3. Utilize immunohistochemistry in the differential diagnosis

A separate fee of $75.00 (including lunch). Limited space
