Current and Practical Issues in Pulmonary Pathology

Kirk D. Jones, MD
Professor of Pathology, UCSF

May 24, 2012
12.15 P.M. - 1.15 P.M.

TOPICS COVERED
1. New classification of idiopathic interstitial fibrosis
2. New classification of adenocarcinoma

OBJECTIVES
The participants will:
1. Recognize new concepts in interstitial lung diseases, with particular emphasis on pulmonary fibrosis and differentiation of idiopathic interstitial pneumonias from fibrosis of know causes.
2. Identify the recent proposed changes in classification of pulmonary adenocarcinoma including concept of lepidic growth, adenocarcinoma in situ, and micropapillary adenocarcinoma.

There is a separate fee of $75.00 (including lunch). Limited space.
