Difficult Differentials in B-Cell Lymphomas

Patrick Treseler, M.D., Ph.D.
Professor of Pathology, Univ. of California San Francisco

Friday, May 25, 2012
12.15 P.M. - 1.15 P.M.

TOPICS COVERED

1. Distinguishing Burkitt lymphoma from diffuse large B-cell lymphoma.
2. Distinguishing plasmacytoma from plasmacytoid small B-cell lymphomas.
3. Distinguishing plasmacytoma from plasmablastic lymphoma.
4. Distinguishing small B-cell lymphomas with increased large cells from transformation to diffuse large B-cell lymphoma.

OBJECTIVES

By the end of the tutorial, the participants will be able to:
Objective 1: Distinguish Burkitt lymphoma from diffuse large B-cell lymphoma.
Objective 2: Distinguish plasmacytoma from plasmacytoid small B-cell lymphomas.
Objective 3: Distinguish plasmacytoma from plasmablastic lymphoma.
Objective 4: Distinguish small B-cell lymphomas with increased large cells from transformation to diffuse large B-cell lymphoma.
