PRACTICAL PROBLEMS IN DERMATOPATHOLOGY

Thaddeus Mully, MD
Associate Professor of Pathology

May 26, 2012
12.15 P.M. - 1.15 P.M.

TOPICS COVERED
1. Strategies for the evaluation of spindle cell neoplasms of the skin
2. Strategies for the evaluation of basaloid neoplasms of the skin
3. Strategies for the evaluation of primary carcinoma of versus metastatic carcinoma to the skin

OBJECTIVES

The participants will:
Objective 1: Form an approach to differentiate spindle cell neoplasms of the skin
Objective 2: Learn techniques to subclassify basaloid neoplasms of the skin
Objective 3: Develop strategies to identify metastatic carcinomas to the skin
